DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 61-68 are rejected under 35 U.S.C. 102(b) as being anticipated by Schultz et al.

Regarding claims 61-62, , 66-67, Schultz et al., discloses a system for measuring parameters of a structure (drill bit) , the system comprising a plurality of strain gauges along with their signal transmission means, a computer apparatus (see, for example, figure 6) for processing signals. The strain gauges are at least three strain gauges (see for example, figure 1) providing axial strain measurements and bending moment (see, for example, claim 5). The system further include temperature measurement means (see, for example, col. 6, lines 5-6).

Regarding claims 63, 68, the bending is being monitored at specific locations, based on strain measurements (see, claim 12).

Regarding claim 64, the plots (such as figures 30 and 31) are being shown by related displays.

Regarding claim 65, the structure is a drill bit, which can be a tubular string.
